

GIOVANNI NUNUTZI ESTRADA

Software developer

@ nunutzi12@gmail.com <https://nunutzi10.github.io/MyPortfolio-master/> 📍 Querétaro

EXPERIENCE

04/2022 - Present

Software developer

TheGuruCompany

- **Version control:** Proficient in using GitLab for managing and tracking code changes.
- **Communication and problem-solving:** Facilitated effective team communication and quickly resolved issues to maintain project cohesion.
- **Product development:** Experience with products focused on Digital Marketing, Connectivity, Internet, and Security.
- **Audits and quality control:** Performed code audits and established controls to ensure stable releases in staging and production environments.
- **Agile methodologies:** Worked with the SCRUM methodology, organizing and optimizing time to meet punctual deliveries.
- **Web development:** Built web solutions using technologies such as HTML, CSS, JavaScript, SCSS, and REST, as well as frameworks like Ruby on Rails (back-end) and Ember.js (front-end).
- **Databases:** Design, management, and optimization of databases using PostgreSQL.
- **Mobile applications:** Developed features for Android (Android Studio) and iOS (Xcode) applications.
- **Work environments:** Experience with Linux and macOS Monterey operating systems.
- **Efficient code:** Focused on writing scalable, efficient, and maintainable code.
- **Automation and artificial intelligence:** Integration of gems like OpenAI for creating intelligent chatbots.
- **Support and ticketing:** Managed requests and tracked tickets using specialized support systems.
- **Intelligent bot development:** Utilized Botpress to create smart chatbots powered by artificial intelligence, capable of learning company-specific information and responding accordingly. Additionally, tailored bots according to client requirements to provide customized conversational experiences.

10/2021 - 04/2025

Software developer

Koonol

- **Customer service automation:** Implemented a Contact Center bot using Dialogflow, Vonage, and Ruby on Rails, optimizing customer service through automated messages for efficient problem resolution.
- **Webhook integration:** Developed features to capture and manage webhooks through APIs, enhancing system communication and responsiveness.
- **Optimization and development of new features:** Created and optimized functionalities for databases and front-end, improving performance and usability.
- **Version control:** Code management and version handling using GitLab.
- **Tools and technologies:** Advanced use of Ruby on Rails, Ember.js, and PostgreSQL in application development and maintenance.

09/2020 - 02/2021

Software developer

Catehe

- **Development of administrative applications:** Created internal web applications for administrative use using Laravel, with HTML, CSS, and some experience in Vue.js.
- **Progressive applications for consumers:** Developed progressive web applications (PWA) targeted at the company's consumers, using pure PHP and JavaScript to enhance accessibility and user experience.
- **Database management:** Created and managed databases using MySQL, HeidiSQL, and PhpMyAdmin, ensuring their integration and performance in applications.

EDUCATION

08/2020

Ingeniería en Sistemas Computacionales

Universidad Cuauhtémoc Querétaro

TRAINING / COURSES

Udemy - Proyectos Web
profesionales con Ruby y Ruby On
Rails
Udemy

Udemy - Ember.js
